

CARDIOVASCULAR PERFUSIONIST

Vancouver, BC

Temporary Full-time & Permanent Part-Time Opportunities

Job Summary:

Within the context of a client and family centred care model and in accordance with established standards of professional practice, and the established mission, vision, values, objectives and policies of the organization, the position works with the Anaesthesiologist and the Surgeon and provides technical support in the direct application of extracorporeal perfusion techniques. Monitors physiological responses of patients undergoing open-heart surgery. Ensures effective and safe patient care. Demonstrates expertise and leadership in perfusion practice. Operates, prepares and maintains perfusion equipment. Maintains and advances clinical competence. Participates on designated Hospital committees/teams and approved research projects as assigned.

Become a key member of our Perfusion team based at Vancouver General Hospital:

Canada's second largest hospital, home to 24 OR theatres (2.5 cardiac) and British Columbia's designated Trauma Centre, the hospital expects to perform over 900 open heart procedures, 1000 cell saver procedures; 70 IABP, ECMO and VADs, liver and lung transplantation and da Vinci procedures. We employ the Sorin S3s heartlung machines; Jostra HCU-30 heater-coolers; Cobe, Medtronic and Fresenius Blood Recovery Systems; and in-line CDI blood-gas system. We are also an approved clinical training site for Cardiovascular Perfusion Interns.

Choose to come to Vancouver not only to work, but also to play:

You'll have the added benefit of being located in one of the world's most beautiful cities, known for outdoor recreational opportunities and events all year round.

Qualifications Education & Experience:

Current certification by the Canadian Society of Clinical Perfusion (C.S.C.P.). Graduation from an accredited school of Perfusion Technology and one year's recent, related experience or an equivalent combination of education, training and experience.
